

1. The first step in the process is to identify the problem. This involves gathering information about the situation and the people involved.

2. Once the problem is identified, the next step is to analyze it. This involves breaking the problem down into its components and understanding how they are related.

3. After analyzing the problem, the next step is to develop a plan. This involves deciding on the best way to solve the problem and the steps that need to be taken.

4. The final step is to implement the plan. This involves putting the plan into action and monitoring the progress.

5. Once the problem is solved, the next step is to evaluate the solution. This involves checking to see if the solution worked and if it was the best one.

6. Finally, the next step is to communicate the results. This involves telling the people involved what was done and why.
